Subject: RE: In-Situ Thermal Remedy Question for Navy Grumman Site

Yes. There is a 2013 ROD.

Additionally, Northrop Grumman has held community updates as they started the remedial action. They have already installed ~230 of the ISTR wells (heater wells, SVE extraction wells, temp probes, etc.).

Thanks
Jason

Hey Jason. Just for background, pls remind me: Has there been a public comment period on the proposed thermal remedy?

Thanks,
Carol

Subject: In-Situ Thermal Remedy Question for Navy Grumman Site

Just had a question that came in from the outside counsel for the Town of Oyster Bay. Was wondering if any of you have any experience with in-situ thermal remediation (ISTR) techniques.

As you may all know, Northrop Grumman is using ISTR to address VOC contamination in soil that is about 40-48 feet bgs at the former ballfield area.

The Town outside counsel asked if Northrop Grumman has prepared a Community Right To Know Plan per the Emergency Planning and Community Right-to-Know Act (EPCRA).

To me, this seems extremely excessive and that it would not apply to a small-scale remediation project.

Thanks, and hope everyone is staying healthy.

We are working from home. I can be reached via email and cell phone.

Jason
